RE: Well Logs
Humboldt Mill Site, Humboldt Township, Marquette County, Michigan

Dear Ms. Muñiz:

Per your request during a phone call with Allen Reilly of Horizon Environmental on May 23, 2012, I am forwarding you the enclosed package of soil boring and well logs.

The package includes soil boring/well logs available in our files for the ten (10) wells that the US EPA sampled on the mill site in October 2011 during its Site Inspection activities. These include: MW-5, MW-9, MW-11, MW-12, KMW-6A, KMW-7, KMW-9, MW-101, MW102 and MW-103. We were able to locate soil boring/well logs for all of the wells sampled by the US EPA, save for two: MW-11 and MW-12. We believe that these two wells were installed sometime between 1992 and 1995 by a prior owner of the mill site. Although we could not find the original soil boring/well logs for these wells in our files, we did locate well inventory and sampling forms (prepared by a Kennecott contractor during a 2006 sampling event) that contain some relevant well construction details, and have included these forms in the package.

Lastly, as we discussed on our June 12 phone call, I would like to reiterate Kennecott's request that the US EPA share the analytical data it generated from soil and ground water samples collected on our property during the course of its Site Inspection activities last fall. We believe that this request is reasonable given the delay being experienced in finalizing the SI Report and the fact that the US EPA has shared property-specific data with other affected property owners within the SI study area. These data will assist us in our on-going due care compliance obligations under Michigan law (Part 201 of P.A. 451, as amended).

If you have questions or wish to discuss anything presented here, please contact me at 906-486-1257, extension 229.

Sincerely,

Kristen Mariuzza, P.E.
Environmental and Permitting Manager
